

fermacell™ Board Knife

fermacell™ Board Knife is a tool with a hooked blade for scoring and snapping fermacell® gypsum fibreboards.

Applications

fermacell™ Board Knife is a hand tool for cutting fermacell® gypsum fibreboards. The knife produces a V-cut and with downward pressure allows the board to be easily snapped to the required size.

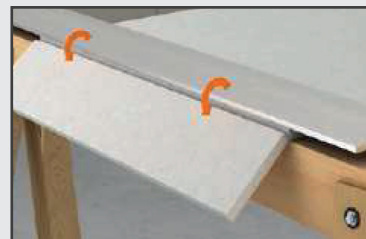

Properties

- Hardened Steel - tungsten tip
- Easy to use - smooth and easy scoring of fermacell® gypsum fibreboards
- Off Cuts - you must install the boards with a 5 - 7 mm gap at joints

Cutting

- Ensure safe working height and mark the dimensions for cutting
- Use a straight edge as a guide to score along, and repeat scoring if needed
- Snap the scored section of the board downwards

For system and application details please also refer to the fermacell® Orange Book
